

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

SEVENTH ANNUAL REPORT

OF THE

# FACTORY INSPECTORS

99517

OF ILLINOIS

FOR THE YEAR ENDING

DECEMBER 15, 1899.

---

SPRINGFIELD, ILL.:  
PHILLIPS BROS., STATE PRINTERS,  
1900.

## LETTER OF TRANSMITTAL.

---

OFFICE OF INSPECTORS OF FACTORIES AND WORKSHOPS,  
NEW ERA BUILDING,

CHICAGO, ILL., Dec. 15, 1899.

*To His Excellency, HON. JOHN R. TANNER, Governor of the State of Illinois.*

DEAR SIR:—I have the honor to submit herewith the seventh annual report of the Inspectors of Factories and Workshops for the year ending December 15, 1899.

Very respectfully yours,

LOUIS ARRINGTON,  
*Inspector of Factories and Workshops.*

## REPORT OF INSPECTOR OF FACTORIES AND WORKSHOPS.

---

*To His Excellency, HON. JOHN R. TANNER, Governor of the State of Illinois.*

GOVERNOR:—In accordance with section nine (9) of the act creating the factory and workshop inspector's office, I have the honor to lay before you in behalf of this department the seventh annual report of the work done, with such recommendations of additional legislation as my experience in enforcing the law has shown to be urgently required.

The work of this department has grown to large proportions as the following tables will show. The repeal of the fire escape law by the Forty-first General Assembly has enabled this department to give more time and attention to the enforcement of the child labor law.

There has been inspected during the year 1899 one hundred and forty-five (145) cities and towns outside of Chicago and Cook county. An increase of fifty over the year 1898. We find employed in Chicago and Cook county two hundred ninety-two thousand two hundred ninety-five (292,295), an increase of forty thousand seven hundred thirty-nine (40,739). In cities and towns outside of Chicago and Cook county we find one hundred nineteen thousand seven hundred seventy-nine, (119,779) employed, an increase of twenty thousand two hundred seventy-eight (20,278). In the entire State the increase in total employés is sixty one thousand seventeen, (61,017). There has been inspected during the year 1899, for child labor, fifteen thousand five hundred seventy-five (15,575) places, an increase over the inspections of 1898 of four thousand seven hundred sixty-eight (4,768). Thirty-seven (37) buildings were inspected for fire escapes and sixty-two (62) inspections for metal polishing wheels, making the total number of places inspected in 1899, fifteen thousand six hundred seventy-four, (15,674) an increase of three thousand four hundred fifty-four (3,454) over 1898. Seven hundred and ninety (790) places have been inspected two and three times during the year, making the total number of inspections for the year 1899, sixteen thousand three hundred fifty-five, (16,355) an increase of three thousand four hundred thirty (3,430) over 1898. There has been nine hundred and forty (940) convictions and four hundred and twenty-three (423) defendants, a decrease of sixty-six (66) convictions over 1898. Eight hundred thirty-three (833) convictions in Chicago and Cook county and one hundred eight (108) in towns out-

side of Chicago and Cook county. The amount of fines imposed was seven thousand eight hundred forty-three dollars, (\$7,843.00) and amount of costs, five thousand two hundred twenty-five dollars and fifty-five cents (\$5,225.55), making a total of thirteen thousand sixty-eight dollars and fifty-five cents (\$13,068.55).

In my last report I called your attention to the necessity of increasing the number of inspectors. The garment workers and all other places where children are employed should at least receive two inspections annually. It is impossible to do this with the present number of inspectors. We find thirty-six hundred seventy-four (3,674) garment makers this year against twenty-nine hundred and forty-four (2,944) in 1898, an increase of seven hundred and thirty-four (734). To inspect these sweat-shops in the spring and in the fall would require five months' work of the entire force. To properly perform the work there should be five more deputy inspectors added to the staff and located in the city of Chicago and Cook county, as three-fourths of the work to be done is in this city and county.

In my last annual report I recommended the enactment of a bake-shop law. I trust this matter will receive favorable consideration at the hands of the Forty-second General Assembly.

I also recommended the enactment of a law compelling all factories and stores subject to inspection to provide suitable seats for the use of the girls and women employed therein. I renew the recommendation and hope it may receive favorable consideration. I find in the large department and other stores, the women and girls are kept on their feet ten hours every day, whether engaged at work or not. This is not only unhealthy, but a wrong that should not be allowed to exist.

In looking over the laws enacted by the Forty-first General Assembly, I find that an injustice has been done this department in regard to the men injured at Sterling, Ill., while descending on a fire escape. The "Whereas" in the act states that "the fire escape was being erected and used by the deputy of such Inspector, and at and under his personal direction and solicitation, Thomas Crawford and Robert T. Hill of said place was, by him, induced to go down on such fire escape." This statement is not correct. Neither myself nor any one connected with this department were in Sterling at that time. Neither myself, assistant nor any deputy had ever seen the fire escape or Hill or Crawford, and this department was in no way responsible for said accident. The fire escape was placed in the building by the agent or representative of the American Automatic Metallic Fire Escape Company for the purpose of giving an exhibition. This department or any member thereof had nothing to do with said fire escape or with Hill or Crawford going down on it. Neither this department nor the State of Illinois were responsible or could be held so, as this department had never inspected or accepted said fire escape, as the law required. On February 2, 1899, I received a communication from the Hon. Alfred N. Abbott, of the Thirty-first District, requesting me to write a strong letter in favor of these men. I replied that I could not comply with the request, as the State was in

no way responsible for the accident. The matter was misrepresented to the Forty-first General Assembly, and an injustice has been done this department and the State. As an act of justice to me and this department, I should have been notified to appear before the committee having charge of these bills. I therefore must conclude that Representative Abbott did not present my letter, to him on the subject, to the committee or the House of Representatives.

#### TENEMENT-HOUSE MANUFACTURE.

When the Legislature of 1893 answered the public clamor aroused by its investigation of sweatshops by the enactment of the factory act of that year, it failed to realize the immensity and difficulties of the problem it had unearthed. That problem remains in Illinois as in all other manufacturing states and countries one of the sorest spots of our whole industrial system.

In a former report the Massachusetts inspector says:

"No more serious problem has developed in recent years in connection with what is called the labor question than that relating to the manufacture of clothing in tenement houses. It has been contended that the miserable occupants of sweatshops are in improved circumstances relatively to their condition in the old world, and ought to be contented. It would be lamentable if these white slaves were contented with their lot. Such conditions must not exist in our community; and the willingness to submit to filthy and unwholesome sanitary surroundings, in order to get the bare means of existence, affords no excuse for those who are endeavoring to maintain the sweating system among us. The people who toil 12 and 14 hours in the sweatshops, for less than the means of comfortable subsistence, and, in addition, are compelled to employ the labor of their children to avoid starvation, are being robbed of their rights as human beings. The sweating system—and everything akin to it and resulting from it—must be suppressed in the interest of humanity. Morality condemns it, good citizenship can not tolerate it. No voice has ever been heard in its defense, either in the legislature or in the public press."

The Pennsylvania inspector said:

"The scenes witnessed during our special investigation of these shops beggar description. I therefore summed up the whole thing in one word, and called them loathsome; fit places for the application of drastic legislative measures."

One of the New York inspectors gives his opinion in the following words:

"In every city we have seen the victims of the system striving with pitiable energy to perform their tasks as they labor, it may well be said unceasingly, in stifling rooms, with every principle of hygiene and health set at defiance, with ill-fed and poorly clad bodies; unclean in person and degraded in mind. We may see the low level of civilization to which they have been forced, by the decayed vegetables and fruit and stinking meat and fish which are the staples on sale at the markets which they patronize. Their animal disregard of the ordinary decencies of life is of itself a sermon upon the appalling demoralization prevailing among these white slaves of the cities, and this alone should incite a general demand for a governmental policy which will relieve the body politic of a blot upon its fame as a progressive and intelligent nation."

The Illinois law of 1893 consisted essentially of two parts:

1. Forbidding in certain trades the employment of others than members of the family in the eating or sleeping rooms of the home. (These trades are the manufacturing in whole or in part of vests, trousers, knee-pants, overalls, cloaks, shirts, ladies' waists, purses, feathers, artificial flowers and cigars.)

2. Providing for the sanitary conditions of these articles and of the shops where they are made, altered, sorted or repaired.

For reasons to be shown these provisions were effective neither as remedial measures nor as tending to check the growth of the evil. For the system has continued to spread alarmingly in spite of a continuous enforcement of the law as rigid as the means at hand would allow. The following table from the inspection of the department will give some idea of the rate of the growth.

The manufacture of garments, cigars and cigarettes in Chicago.

	1894.	1895.	1896.	1897.	1898.	1899.
Number of shops.....	2,199	2,443	3,194	4,264	3,353	4,040
Number employed.....	22,273	28,168	38,471	35,422	28,488	33,965

This is an increase of 57 per cent in the number employed in these industries in six years. Every report of this department has teemed with proofs of the inadequacy of the law. The report of 1895 says: "These provisions aim to regulate tenement house manufacture and to modify some of its evils, while recognizing and maintaining the system." The theory is disproved by two and a half years faithful endeavor to apply it. A large part of every previous report has been taken up with facts and figures showing the failure of the law in general and in detail to meet the evils of the system.

#### THE EXTENT OF THE EVIL.

If we add to the number employed in the making of cigars and cigarettes and in the garment trades, those employed in the bakeries, we have a total of 42,564 people employed in the industries in which these evils prevail. We may estimate the number of home finishers not included in this total at 20,000 making a grand total of 60,000 people. It is difficult to realize the significance of these figures. In Chicago the clothing trade is the principal occupation of whole nationalities, and districts many square miles in extent, are literally infested with its shops. Many are not aware that in the point of number of employes, the clothing trade today is the largest single manufacturing industry in the State of Illinois.

The principal trades in which the factory has not superseded the antiquated work-shop are, in the order of their importance:

Men's and boys' clothing, ladies' tailor made clothing, cigars and cigarettes, bake shops, shirts and waists, hats and caps, overalls, furs, also slippers, underwear, neckwear, gloves, mittens, gaiters, candy and preserves. Shoes are for the most part made in the factory.

The men and children's clothing trade alone employs about 25,000 people in the shops besides an army of home finishers, which we may estimate at 10,000, in all 35,000 people. To understand its evils it is necessary to have some idea of the nature of this trade. The large

wholesale manufacturers have cutters in their own establishments, but usually send the cut goods out to the contractors' shops to be made at so much a piece. These contractors' shops, commonly called sweatshops, seldom employ more than 20 or 30 hands and rarely use steam power. A few of them which have adopted steam employ, of course, several times as many as the others. Some times the work of making the garments is all done in the shops but usually it is finished outside by parties who are paid at so much a piece by the contractor. The coats are sent by the contractors of a given neighborhood to the button-hole shops of that locality, where a few button-hole machines can do the work for a large number. Pants and vests are sent to the home finisher, who is nearly always a woman working in the living rooms of the family.

Some of the larger houses have established factories of their own, but it may be seen, from the fact that out of 3,674 establishments in the garment trades only 89 employed over 50 people, that these factories do not yet contain a very important part of the total number employed.

The merchant tailors rarely have other employés than cutters in their establishments. Their sewing is done in the same manner as that of the wholesale establishments except that a large part of their work is done by skilled men working for themselves in their homes or in rooms jointly rented by several of their number. Where they are working at home they are to be classed for our purposes with the home-finishers.

These home-finishers are among the very poorest of the city. Their homes are nearly always unwholesome and often in a filthy condition—in fact of the garment shops reported as filthy by the inspectors, 10 out of 11 were places where only one person was employed. It is useless to attempt to describe here the variety and depth of misery in the surroundings among which these people live. Some account may be found in the previous reports. The thing to be remembered is that this is the worst feature of the whole system and the most difficult to remedy.

#### THE CONDITION OF EMPLOYÉS.

The universal condemnation the sweating system has received from all who know it, justifies only a very brief reference to its evils in this place. As one factory does the work of a dozen or more sweatshops, it is evident that these shops must pay more rent in the aggregate than the factory and that there must be a considerable reduplication of expenses in the shops which would cause them to exceed in the total those of the factory. As these shops get their goods from the wholesale house or custom tailor and return them there when they are made, the cost of transportation or expressage must be added as an expense that the factory does not need to bear. Moreover, the use of foot-power in the shops makes it impossible for the rate of production there to equal that of the factory.

How then do these shops maintain themselves? At the expense of the employés. The sweater through a personal knowledge of the people of his neighborhood or nationality, can take advantage of their ignorance and necessities. If there is a demand on the part of the employers for a brief and busy season, by means of this system new shops will spring into existence with great rapidity. As the season draws to a close the work decreases and the employés are discharged one by one until finally the work ceases altogether. On account of his intimate knowledge of the labor market the sweater can hire or discharge his neighbors with an ease impossible in the factory. Not only does he understand them, but they know that he is but a small link in the chain and do not hold him responsible for the irregularity of their employment. Another reason why he can so easily regulate the amount of work done is that he does not have the constant expenses of steam-power to pay, which makes it impossible for a factory to be operated profitably by a small fraction of the full force. Often it will pay a shop employing twenty hands to continue work with three or four, while the product of a factory operated by such a proportion of its employés would not repay its heavy operating expenses.

All these economies are practiced at the expense of the work people and we find a corresponding result when we look at the conditions in which we find them. For men, women and children, skilled and unskilled, the wages are lower than for the same classes in any other industries. The employment is irregular, not only from year to year and from month to month (the regular season only lasts from 4 to 8 months), but even from day to day. Those working in this industry can never look forward to the future with any real security. As a result of the use of foot-power, as shown above, the hours of labor are exceptionally long and may be indefinitely extended at any time. In the height of the season it is a common thing to find the people working 15 to 16 hours, and at times even longer periods. The rate which they work under the immediate eye of a taskmaster, whose very existence as a master depends on his ability to keep this rate at its maximum, is suggested by the term sweating, which often gives as literally time description, and this means a good deal where physical strength is not the main factor in the work. The use of foot-power brings a strain that is especially injurious to women and children. In a special investigation by this department, it was shown that spinal curvature and other very serious afflictions are frequently caused by this work. Among child operatives of button-hole machines lateral curvature of the spine was found to be the rule rather than the exception.

The sanitary conditions are perhaps the most injurious of all evils of the system. The working rooms are as a rule ill-lighted, ill-heated and not ventilated at all. They are often in basements of tenement houses, where the light is altogether insufficient for the intense application of the eyes that this work demands, and in time serious results are bound to follow. They are underheated in very cold

weather and in summer their situation on alleys and back yards, amidst the stenches of garbage and refuse, is unhealthy in the extreme. The rooms are nearly always over-crowded and would in few cases give that amount of breathing space that competent physicians declare is the indispensable minimum for human needs. There are no provisions for proper ventilation, which is so much needed in these shops where the oxygen is consumed and the air poisoned by the pressers' charcoal irons. Closets are often not provided at all, and almost never for both sexes.

That women and children are employed in this more than in any other large industry may be seen by turning to the tables of this report. The following table shows that the percentage of children is nearly what it was six years ago and that the percentage of women has been approximately maintained for the past two years:

*Employés in Garment Trades in Chicago.*

	Total.	Women.	Per cent of Women.	Children.	Per cent of Children.
1894.....	19,644	11,162	56.8	1,158	6.4
1895.....	24,796	13,832	55.8	1,832	7.4
1896.....	24,517	13,439	54.1	1,580	6.0
1897.....	31,965	16,530	51.9	1,798	5.4
1898.....	25,711	13,072	51.2	1,624	6.3
1899.....	35,858	18,332	51.1	2,150	5.9

This result is also largely due to the presence of the contractor, who is obliged by the economy he is forced to practice to displace as many men as possible by women and children and whose location best enables him to do this. All these abuses, which by the very nature of the small shop, are to be found there to a greater extent than in the factory, tend to decrease and in some cases to disappear with the development of the factory system.

#### THE PUBLIC DANGER.

It has been shown repeatedly that an incredible amount of disease is communicated through the clothing made by this system and it is impossible that it should be otherwise. The public is put in peril not only on account of the lowered vitality of the employés, who are so often affected by the "tailors sickness," consumption and, working under the unhealthy conditions described, are peculiarly liable to succumb to every form of contagious disease, but is endangered to a still greater degree by the location of the shops, which are largely on tenement-house premises. These houses are crowded with the children of the poorest classes, and the clothing and those working on it are directly exposed to every disease current among them and infection of all the clothing passing through the employés' hands is almost sure to follow, for the processes employed necessitate a great deal of handling and a very close relation between the worker and the material used. Besides the consumption so general in the shops, these districts are the home of scarlet fever, diphtheria, typhoid and small-pox.

When it is remembered that besides these means of spreading contagion, we have a continuous stream of home finishers taking the clothing from the shops into their unhealthy homes, where it stays among the children until returned to the shops, sometimes several days later, it will be seen that there is little likelihood that any contagious disease they have among them will fail to be communicated to the clothing made in the sweat shops. Even in the case of the coat shops, where there is no home finisher, we have the button-hole shop where the clothing of a whole neighborhood is brought together and the risk of infection considerably increased.

In 1894 when small-pox was raging in Chicago in its most virulent form, the Bohemian Sweat Shop district was the most stricken part of the city. The reports of this department show that the manufacture of clothing was unabated, even at a time when there was scarcely a tenement house without its case of small-pox. Thousands of garments were turned out under these conditions to be distributed among the stores of Chicago, and sent out over the country and into every town and county in this State. Yet nothing has been done since that time to enable the authorities to stamp out this constant source of disease and death among the people of this State.

#### THE DEFECTS OF THE PRESENT LAW.

The present law is deficient for the following reasons: 1. It fails to give the inspectors proper means for ascertaining the names and addresses of the shops. On account of the precariousness of his living, the owner of the small shop is very migratory, often moving several times during the year. The law requires his employer to keep a list of these shops, but these lists are hardly ever reliable, because the employer has no means of knowing when the owner of the shop has moved.

2. When a room in a dwelling house is used as a shop, and others than members of the family employed there, the law as interpreted by the court, merely requires that the door between the work-room and the dwelling rooms be locked and a separate entrance provided. It will be readily acknowledged that the provision furnishes little or no protection to the public, if there are such contagious diseases as small-pox in the house. As for the home shop, the public is furnished no protection whatever—until after the disease has broken out and is discovered by the authorities. How little this means can only be understood from the previous reports.

3. With a view to protect the public, the law provides for the destruction of clothing made under unsanitary conditions. As it takes the inspectors at present established in Chicago several months to make the rounds of the sweat shops alone, largely omitting the home shops, (which are several times as numerous) the impracticability of this provision, which would require frequent inspections of every shop may be seen. Moreover, it could never furnish adequate protection to the public health, as is proved by the successful efforts

to evade the law during the small-pox epidemic of 1894, notwithstanding the strenuous efforts made to enforce it. This remedy is at best an attempt to cure, while it is preventive measures that are most needed.

4. The law fails to furnish medical officers whose duties it should be to declare when the conditions of the shops or products are unsanitary as defined by the law. It has been evident to this department from the first that medical officers were needed to act directly under its jurisdiction. Not only to provide against contagion in the sweat shops, but to enforce the provision requiring minors to furnish a medical certificate from a physician of good standing, when it is demanded by the inspector. As it is this law is a nullity, for it is always possible to find a physician who will grant the certificate at a small charge. Most flagrant cases of this kind have been shown in previous reports.

5. The law does not apply to bakeshops, which are if anything in worse condition, both as regards the public and the employées, than the shops described. There is no assignable reason why legislation directed against the present conditions of clothing manufacture, by which the citizen is in danger several times during the year, should not apply with equal force against the squalid surroundings of our bakeries from which we get our daily bread. On account of the ovens, these shops are frequently in basements, whose floors and walls are foul with dirt. Damp and unventilated, the heat of the ovens and the extraordinary length of the hours put the bakeries among those industries which are hardest on the worker, as well as most dangerous to the public health.

6. For some unaccountable reason, several important articles of clothing were also omitted from the scope of the Act. These have been included in the present recommendations.

#### RECOMMENDATIONS.

No. 1. The enactment of a law providing for the appointment of two physicians as members of the Factory Inspector's Staff, as recommended in previous reports.

No. 2. The enactment of the following law with reference to bakeries:

#### *A bill for an act relating to bakeries and confectioneries.*

SECTION 1. Drainage and Plumbing of Buildings and Rooms Occupied by Bakeries.] *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* All buildings or rooms occupied as biscuit, bread, pie or cake bakeries shall be drained and plumbed in a manner conducive to the proper and healthful sanitary condition thereof, and shall be constructed with air shafts, windows or ventilating pipes sufficient to insure ventilation. The factory inspector may direct the proper drainage, plumbing and ventilation of such room or buildings. No cellar or basement not now used for a bakery shall hereafter be so occupied or used unless the proprietor shall comply with the sanitary provisions of this article.

§ 2. Requirements as to Rooms, Furniture, Utensils and Manufactured Products.] Every room used for the manufacture of flour or meal food products shall be at least eight feet in height, and shall have, if deemed necessary by the factory inspector, an impermeable floor constructed of cement, or of tiles laid in cement, or an additional floor of wood properly saturated with linseed oil. The side walls of such rooms shall be plastered or wainscotted.

The factory inspectory may require the side walls and ceiling to be white-washed at least once in three months. He may also require the woodwork of such wall to be painted. The furniture and utensils shall be so arranged as to be readily cleansed and not prevent the proper cleaning of any part of the room. The manufactured flour or meal food product shall be kept in dry and airy rooms, so arranged that the floor, shelves and all other facilities for storing the same can be properly cleaned. No domestic animals, except cats, shall be allowed to remain in a room used as a biscuit, bread, pie or cake bakery, or any room in such bakery where flour or meal products are stored.

§ 3. Wash rooms and Closets—Sleeping Places.] Every bakery shall be provided with a proper wash-room and water-closet, or water-closets, apart from the bake-room, or rooms where the manufacture of such food product is conducted, and no water-closet, earth-closet, privy or ash-pit shall be within or connected directly with the bake-room of any bakery, hotel or public restaurant. No person shall sleep in a room occupied as a bake-room. Sleeping places for the persons employed in the bakery shall be separate from the rooms where flour or meal food products are manufactured or stored. If the sleeping places are on the same floor where such products are manufactured, stored or sold, the factory inspector may inspect and order them put in a proper sanitary condition.

§ 4. Inspection of Bakeries.] The State Factory Inspector shall cause all bakeries to be inspected. If it be found upon such inspection that the bakeries so inspected are constructed and conducted in compliance with the provisions of this chapter, the factory inspector shall issue a certificate to the person owning or conducting such bakeries.

§ 5. Notice Requiring Alterations.] If, in the opinion of the State Factory Inspector, alterations are required in or upon premises occupied and used as bakeries, in order to comply with the provisions of the article, a written notice shall be served upon him by the owner, agent or lessee of such premises, either personally or by mail, requiring such alterations to be made within sixty days after such service, and such alterations shall be made accordingly.

§ 6. Any person who violates any of the provisions of this act, or refuses to comply with the requirements as provided herein of the factory inspector or his deputy, who are hereby charged with the enforcement of this act, shall be guilty of a misdemeanor, and on conviction shall be punished by a fine of not less than twenty (20) nor more than fifty (50) dollars for the first offense, and not less than fifty (50) nor more than one hundred (100) dollars for the second offense, or imprisonment for not more than ten (10) days; and for the third offense, by a fine of not less than two hundred and fifty (250) dollars and not more than thirty (30) days' imprisonment.

No. 3. The enactment of the following law with regard to the other industries under consideration:

SECTION 1. *Be it enacted, etc.,* That no room or apartment in any tenement or dwelling house shall be used for the manufacture of coats, vests, trousers, knee pants, overalls, skirts, dresses, cloaks, hats, caps, suspenders, jerseys, blouses, waists, waist bands, underwear, neckwear, furs, fur trimmings, fur garments, shirts, hosiery, gloves, mittens, slippers, shoes, gaiters or any other garments, purses, feathers, artificial flowers, cigarettes, cigars, and no person, firm or corporation shall hire or employ any person to work in any room, apartment, or in any building, or parts of a building at making in whole or in part any of the articles mentioned in this section, without first obtaining a written permit from the factory inspector, or one of his deputies, stating the maximum number of persons allowed to be employed therein and

that the building, or part of building, intended to be used for such work or business is thoroughly clean, sanitary and fit for occupancy for such work or business. Such permit shall not be granted until an inspection of such premises is made by the factory inspector or one of his deputies. Said permit may be revoked by the factory inspector at any time the health of the community or those so employed may require it. It shall be framed and posted in a conspicuous place in the room, or in one of the rooms to which it relates. Every person, firm, company or corporation contracting for the manufacture of any of the articles mentioned in this section, or giving out the incomplete material from which they or any of them are to be made, or to be wholly or partially finished, shall, before contracting for the manufacture of any of said articles, or giving out said material from which they or any of them are to be made, require the production by such contractor, person or persons of said permit from the factory inspector as required in this section, and shall keep a written register of the names and addresses of all persons to whom such work is given to be made, or with whom they may have contracted to do the same. Such register shall be produced for inspection and a copy thereof shall be furnished on demand made by the factory inspector or one of his deputies: *Provided*, That nothing in this section shall be so construed as to prevent the employment of a seamstress by any family for manufacturing articles for such family use.

§ 2. Not less than two hundred and fifty cubic feet of air space shall be allowed for each and every person in any work room where persons are employed at such labor as hereinbefore described. There shall be sufficient means of ventilation provided in each work room of every such establishment and said work room or rooms in said establishment shall be kept thoroughly clean, sanitary and fit for occupancy for such work or business. The factory inspector and deputy factory inspector, under the direction of the factory inspector, shall notify the owner, agent or lessee in writing to provide or cause to be provided ample and proper means for ventilating such work room or rooms, and to put said work room or rooms in a thoroughly clean, sanitary and fit condition for occupancy for such work or business and shall prosecute such owner, agent or lessee if such notification be not complied with within ten days of the service of such notice.

§ 3. A printed copy of this act shall be furnished by the inspector for each work room of every factory, manufacturing or mercantile house, where persons are employed, who are affected by the provisions of this act, and it shall be the duty of the employer of the person employed therein to post and keep posted said printed copy of the law in each room.

This law has had a thorough trial in New York, Pennsylvania and Massachusetts and there is no doubt of its successful operation. Not only will it to a certain extent protect the public and employes from the danger of tenement-house manufacture, but it will check the growth of the sweatshop system and aid in the development lately noticeable towards the more wholesome conditions of the factory. In 1894 this department reported that the garment factory was disappearing before the tenement-house shop. In the last two years the number of establishments in the garment trades employing more than fifty people has increased from seventy to eighty-nine. This with other data at hand leads to the conclusion that the tendency is now in the other direction.

The proposed law in eliminating the most unsanitary shop will also eliminate the most tenacious rivals of the factories. As the economies practiced by such places at the expense of the employes and the public are no longer tolerated, they will not be able to compete with the steam-power and progressive management of the modern factory. In this future extension of the factory lies the best hope

of doing away with the abuses that are inherent in the sweating system and will never entirely disappear as long as the system itself survives.

The following table will show the result of inspections for the year 1899:

Total number places inspected.....	15,684
Number of places inspected for child labor.....	15,575
Number of places inspected for fire escapes and approval.....	37
Number of inspections for metal polishing wheels.....	62
Number of places inspected outside of Chicago and Cook county.....	3,664
Number of cities and towns visited outside of Cook county.....	145
Number of places inspected in Chicago and Cook county.....	11,911
Total number of employés.....	412,074
Number of males over 16 years of age.....	327,188
Number of females over 16 years of age.....	71,240
Number of males under 16 years of age.....	8,362
Number of females under 16 years of age.....	5,284
Total number of employés in Chicago and Cook county.....	292,295
Number of males over 16 years.....	223,373
Number of females over 16 years.....	58,103
Number of males under 16 years.....	6,183
Number of females under 16 years.....	4,636
Total number of employés outside of Chicago and Cook county.....	119,779
Number of males over 16 years.....	103,815
Number of females over 16 years.....	13,137
Number of males under 16 years.....	2,179
Number of females under 16 years.....	648
Total number of convictions.....	940
Total number of defendants.....	423
Number of convictions in Chicago and Cook county.....	833
Number of defendants in Chicago and Cook county.....	392
Number of convictions outside of Chicago and Cook county.....	108
Number of defendants outside of Chicago and Cook county.....	31
Number of convictions for employing children under 14 years.....	38
Number of convictions for employing children between 14 and 16 years without affidavits.....	870
Number of convictions for employing persons not members of immediate family in living rooms.....	11
Number of convictions for failure to provide fans or blowers for metal polishing wheels.....	12
Number of convictions for employing children under 16 years more than 10 hours in one day.....	1
Number of convictions for failure to produce list of outside finishers for inspection.....	1
Amount of fines and costs.....	\$13,068 55
Amount of fines.....	\$7,843 00
Amount of costs.....	5,225 55

*Comparison of Children with Total Employés.*
